

MPTL

Cat6A S/FTP LSOH Cable Adapter **CABLENET**

Modular Plug Terminated Links

Female Jack

Male Plug

Key Features

- Designed for IoT and smart buildings.
- Secures & simplifies connection of cameras, AP PoE lighting.
- Perfect for 10G Ethernet & backwards compatible.
- MPTL is a TIA International recognised standard connection.

Applications

MPTL Cable adapters are designed for use in connecting IP devices to the network. Including cameras, wireless access points & PoE lighting systems.

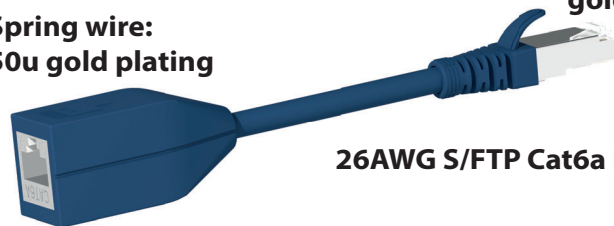

Allow fast, easy deployment of remote devices when the length of connection is unknown. Easy and quick to use with adds, moves and changes and are much less disruptive.

MPTL leads improve security by eliminating visible and accessible patch leads that can be intentionally or unintentionally disconnected from a device. Ideal for publicly mounted access points or surveillance cameras.

They can be used as intermediate connection points between the ceiling consolidation points ready for when the end devices are installed.

They also eliminate the need to use field terminated RJ45 plugs to connect directly to end devices.

S/FTP Plug: 50u gold plated

26AWG S/FTP Cat6a Patch Cable

Spring wire: 50u gold plating

Jack Assembly: Fully shielded zinc alloy
