

Balance Board for Standing Desks or Sit-Stand Workstations

Product ID: BALBOARD

This balance board for standing desks gives you a fun and easy way to engage both your mind and body, by providing a way to add more movement to your workday.

Standing at work is an effective way to help counter the negative effects of too much sitting. Adding low-impact movement while standing can help to energize your workday.

The balance board is designed with an unstable platform for standing. This encourages balancing movement to help to engage the stabilizing muscles in your legs and core. As a result, it can enhance your core stability and balance, and help to increase your focus and alertness.

The standing-desk balance board rests on a spherical base, which allows you to tilt and swivel with ease. You can rock back and forth, or side to side, to provide gentle movement while standing. It's easy to move the balance board out from under your desk, or slide it back underneath, using the foot control feature.

The balance board is made of durable plastic with a soft carpeted top surface for added comfort. It comes with four rubber feet that you attach to the board easily.

BALBOARD is backed by a StarTech.com 2-year warranty and free lifetime technical support.

Certifications, Reports and Compatibility
