APC™

by Schneider Electric

Bottom Panel Installation

1. Install the bottom panel first. Tilt the panel into the side brace on the bottom of the rack as shown in the illustration.

2. Bring the panel up into position over the side brackets located on the rack.

Top Panel Installation

3. Install the bottom edge of the top panel over the top edge of the bottom panel.

4. Tilt the panel up into position.

5. Lock the top panel with the key to secure it into position. The lock latch in the vertical (locking) position fits behind the top side brace.
